

We firmly believe that the internet should be available and accessible to anyone, and are committed to providing a website that is accessible to the widest possible audience, regardless of circumstance and ability.

We utilize an accessibility interface that allows persons with specific disabilities to adjust the website's UI (user interface) and design it to their personal needs. Features are outlined below:

UI, design, and readability adjustments

1. **Font adjustments** – users can increase and decrease its size, change text alignment, adjust text spacing and line height. Users also have the ability to enable dyslexia friendly and legible font options.
2. **Color adjustments** – users can select various color contrast profiles such as light, dark, inverted, and monochrome.
3. **Animations** – epileptic users can stop all running animations with the click of a button. Animations controlled by the interface include videos, GIFs, and CSS flashing transitions.
4. **Content highlighting** – users can choose to emphasize important elements such as links and titles.
5. **Audio muting** – users with hearing devices may experience headaches or other issues due to automatic audio playing. This option lets users mute the entire website instantly.
6. **Cognitive disorders** – we utilize a search engine that is linked to Wikipedia and Wiktionary, allowing people with cognitive disorders to decipher meanings of phrases, initials, slang, and others.
7. **Additional functions** – we provide users the option to change cursor size and enable reading guide, reading mask, and tooltips.

Notes, comments, and feedback

Despite our very best efforts to allow anybody to adjust the website to their needs, there may still be pages or sections that are not fully accessible, are in the process of becoming accessible, or are lacking an adequate technological solution to make them accessible. Still, we are continually improving our accessibility, adding, updating, and improving its options and features, and developing and adopting new technologies. All this is meant to reach the optimal level of accessibility, following technological advancements. If you wish to contact the website's owner, please use the following email: marketing@eafrelief.ca.
